## PROJECTS

### PORTFOLIO WEBSITE BY USING (HTML,CSS)

Aportfolio websiteiscreatedusing HTMLandCSS.HTMLisusedto build the basic structure of the webpage, such as headings, paragraphs, images, links, and different sections. CSS is used to style the webpage by adding colors, layouts, fonts, borders, spacing, and responsive design so that the website looks attractive on both mobile and desktop screens.

### SIMPLE CALCULATOR BY USING C LANGUAGE

The calculatoris usuallybuiltusing conceptslike variables, switch-case statements, if-else conditions, and functions. The switch-case structure is especially useful because it allows the program to execute different operations based on the user's choice. For example, if the user presses 1, the program performs addition; if the user presses 2, it performs subtraction, and so on. This makes the calculator easy to understand and simpleto use.t
